

Vastu Commons™

A Business Campus of Uncommon Harmony

VASTU-INSPIRED ARCHITECTURE

- Based on principles of intelligence and order, the vastu-inspired architecture of Vastu Commons is scientifically developed from ancient as well as current thought in designing and organizing internal spaces.
- Vastu's primary purpose is to achieve harmony and a sense of well-being. With its roots in India, and predating the Chinese science of Feng Shui, the science of vastu has come to this country as an architectural approach that helps businesses plan orderly, productive, and pleasant spaces for all who enter their premises.
- Vastu Commons' developers work with consulting architects who are experienced in the development of interior spaces utilizing the architectural principles of Vastu Shastra. Together they offer you the highest standards of thoughtful and professional buildouts for your new offices at Vastu Commons.

RECOMMENDED READING

- **Building with the Breath of Life** by *Eva Wong*
One of the best introductions and for the person who wants to practice this discipline.
- **The Natural House Catalogue** by *David Pearson*
An excellent survey and resource.
- **Sacred Geometry** by *Robert Lawlor*
A step by step presentation to this subject.
- **Silence Song and Shadows** by *Tom Bender*
An introduction to the possibility of structuring the sacred in our built environments.
- **Sthapatya Veda** by *Dr. V. Ganapati Sthapati*
The complete textbook on building architecture of Vaastu Shastra by the master.
- **Thai Style** by *Luca Invernizzi Tettoni and William Warren*
Good examples of wood buildings that exhibit traditional plan solutions that suggest a relationship to the ancient knowledge of Vaastu science.
